

I'M CONSIDERED AN ESSENTIAL SERVICE, HOW DO I PROTECT MYSELF?

TIPS FOR EMPLOYEES

Clean hands often: Use soap and water and wash for 20 seconds. Soap and water definitely should be used if hands are visibly dirty. Alcohol-based hand sanitizer containing at least 60% alcohol may be used after customer interactions, but should not replace washing hands often with soap and water.

Avoid touching products or surfaces that customers touch, as much as possible.

Clean and disinfect frequently touched surfaces.

Stay home if you have respiratory illness symptoms.
