Press Release

Gallatin County COVID-19 Update

As of Tuesday, July 28, 2020, at 12 p.m. Gallatin County has 12 new confirmed cases of COVID-19, for a cumulative total of 804. There are 66 confirmed active cases and five current hospitalizations. There have been a total of 736 people recovered in Gallatin County. Two people have died from COVID-19 complications.

One case that had been previously reported in another area was reassigned to Gallatin County and added to another day's total.

The new cases are located across Gallatin County and are related to community transmission, contacts with known cases and travel.

More data can be found on Gallatin City-County Health Department's dashboard on our website [here](#). This dashboard will be updated by 12 p.m. daily. Information on statewide cases continue to be found [here](#).

Please note that local data may differ from data about Gallatin County provided by the state as the Gallatin City-County Health Department may be alerted to additional cases before the state.

The Gallatin City-County Health Department calculates the **recovered case number** as the number of total cases minus any active cases, current hospitalizations and deaths.

Due to national demand, people who are not close contacts of a known case and don't have symptoms are getting delayed COVID-19 test results.

Because of the increased demand for testing and limited national testing resources, labs must prioritize processing tests of symptomatic individuals or close contacts to a known case. Asymptomatic people and those with no known exposure cannot be prioritized over those who have symptoms or those who are identified as a close contact of a known case.

215 W. MENDENHALL, BOZEMAN MT 59715

The Gallatin City-County Health Department Call Center is open seven days a week from 8 a.m. to 5 p.m. to answer questions about COVID-19. Reach the Call Center by phone at 406-548-0123 or email at callcenter@readygallatin.com.

The most accurate local source of information remains the GCCHD [website](#).
