Press Release

Gallatin County COVID-19 Update

As of Wednesday, July 8, 2020, at 12 p.m. Gallatin County has one new confirmed case of COVID-19 and a cumulative total of 346.

Please note that there have been a number of previous cases that were reported to the state that have been reassigned to Gallatin County and were added to the county's previous day totals on the Gallatin City-County Health Department's [COVID-19 dashboard](#).

There are 50 confirmed active cases and no current hospitalizations. There have been a total of 295 people recovered in Gallatin County. One person has died from COVID-19 complications.

More data can be found on Gallatin City-County Health Department's dashboard on our website [here](#). This dashboard will be updated by 12 p.m. daily. Information on statewide cases continue to be found [here](#).

Please note that local data on active cases may differ from the state map as the state map is only updated once daily and calculates active cases differently.

The Gallatin City-County Health Department calculates the **recovered case number** as the number of total cases minus any active cases, current hospitalizations and deaths.

Did you know the median age of those diagnosed with COVID-19 is falling? And young people have more close contacts, both professionally and socially. Summer may be here, but COVID-19 cases continue to rise and we need everyone's help to minimize the spread to our neighbors, family members, and loved ones.

Whether you're young or old, city-dwellers or rural residents, year-long residents, snow birds or vacationers, do your part to prevent the spread: avoid the crowds, wash your hands, keep your distance, wear a face covering, and stay home if you are sick.

The Gallatin City-County Health Department Call Center is open seven days a week from 8 a.m. to 5 p.m. to answer questions about COVID-19. Reach the Call Center by phone at 406-548-0123 or email at callcenter@readygallatin.com.
