Press Release COVID-19 Deaths in Gallatin County

The Gallatin City-County Health Department is saddened to announce that two more Gallatin County residents have passed away from complications due to COVID-19.

One person was a female in her 90s who died at an assisted living facility the week of October 10. The other was a male in his 60s who died at his home the week of September 5. This death was identified during a routine death record reconciliation. The Gallatin City-County Health Department received the official death certificates yesterday that attributed these deaths to COVID-19.

These latest deaths make for a total of 84 COVID-related deaths in Gallatin County. Statewide data reported by the Montana Department of Public Health and Human Services can be found [here](#).

No further details will be released out of respect for the individuals, their families, and friends.

In Gallatin County, 62% of eligible residents are fully vaccinated, ranking us the fourth most vaccinated county in the state. From July 1 to October 23, 2021, Gallatin County saw 216 residents hospitalized who were positive for COVID-19. Of those, 172 individuals were unvaccinated or approximately 80%. From August 21 to October 15, 2021 statewide, [MT DPHHS reported](#) 327 deaths that are attributed to COVID-19. Of those deaths, 254 were unvaccinated or 78%.

The COVID-19 vaccines are safe and effective at reducing the risk of severe infection, hospitalization, and death. COVID-19 vaccines are available to anyone over the age of 12 from local pharmacies and clinics throughout the county. It is highly recommended that you make a plan to get fully vaccinated to help protect yourself and others.

The GCCHD website provides up-to-date times, dates, and locations where you can get your COVID-19 vaccine anywhere in Gallatin County. [Visit our website](#) and make a plan to get your vaccine today.
