### Press Release COVID-19 Deaths in Gallatin County

The Gallatin City-County Health Department is saddened to announce that three more Gallatin County residents have passed away from complications due to COVID-19.

The first person is a male in his 70s who passed away in a hospital the week of December 19. The Gallatin City County Health Department received the official death certificate yesterday that attributed his death to COVID-19.

The second is a female in her 70s who died at a hospital outside of Gallatin County the week of December 19. The third is a female in her 70s who died at a hospital outside of Gallatin County the week of November 28. The Gallatin City-County Health Department received these official death certificates through a regular data reconciliation that attributed their deaths to COVID-19.

Out of respect for all of these individual's families and friends, no further details will be released.

These latest deaths make for a total of 111 COVID-related deaths in Gallatin County. Statewide data reported by the Montana Department of Public Health and Human Services can be found [here](#).

In Gallatin County, 61% of eligible residents are fully vaccinated. For additional details on vaccine metadata, [click here](#). From April 1, 2021 to January 14, 2022, the state saw 5,813 hospitalizations who were positive for COVID-19. Of those, 4,810 individuals were unvaccinated or approximately 83%. From April 1, 2021 to January 14, 2022 statewide, [MT DPHHS reported](#) 1,362 deaths were attributed to COVID-19. Of those deaths, 1,068 or 78% were unvaccinated.

You can find your COVID-19 vaccine at local pharmacies and clinics throughout the county. It is highly recommended you make a plan to get fully vaccinated, including a booster dose if you are [eligible](#), to help protect yourself and others.
