Communicable Disease News:

Mpox* Update: As of 12/14/22, CDC and WHO are tracking 29,646 confirmed mpox/orthopoxvirus cases in all 50 US states/territories, including 20 deaths attributed to monkeypox/orthopoxvirus. **As of 12/14/22, there have been seven cases of mpox/orthopoxvirus reported in Montana.** DPHHS urges providers to be alert for patients who have rash illnesses consistent with monkeypox, regardless of whether they have travel or specific risk factors for monkeypox, and regardless of gender or sexual orientation. Healthcare providers in Montana should report suspect cases to your local health dept, who will notify the CDEpi Section at DPHHS. Information for [healthcare providers](#) is found on CDC’s website and there is a [new clinician FAQ resource](#). For local resources & information, such as our vaccine waitlist, visit the [Healthy Gallatin website](#).

- * “mpox” is a synonym for monkeypox. Both names will be used simultaneously for one year while “monkeypox” is phased out. For more information about the name change, see [WHO recommends new name for monkeypox disease](#).

Influenza: Influenza activity **increased** statewide during MMWR Week 49, with 1,245 new cases, 68 hospitalizations, and 2 deaths reported. Season-to-date, Montana has had 4,367 cases, 200 hospitalizations, and 6 deaths associated with influenza. Currently, Influenza A is the dominant influenza type circulating in Montana, seasonal subtypes H1N1 (n=90) and H3N2 (n=181) have both been detected.

- When comparing the five most recent* influenza seasons, the average number of total influenza cases reported through MMWR week 49 was 128, and the average number of total hospitalizations was 26.
 - *The 5-year season average does not include data from the 2020-2021 influenza season, where there were no confirmed influenza cases in Montana.
- Influenza-like illness (ILI) in Montana increased from 3.93% to 4.49%. During week 49, RSV percent positivity increased to 19.12%.

Gallatin County Weekly Communicable Disease Report

Gallatin County COVID-19 Data

During MMWR Week 50 (week ending 12/17/22), 121 new COVID-19 cases were reported among Gallatin County residents. Among the newly reported cases, approximately 50% were confirmed breakthrough cases, defined as testing positive for SARS-CoV-2 ≥ 14 days after receiving a primary COVID-19 vaccine series. As of December 17, 2022, Gallatin County reports 12,493 cases of confirmed breakthrough disease, which includes 307 hospitalizations and 29 deaths.

Table 2. Summary of COVID-19 Activity among Gallatin County residents reported between 3/17/2020 to 12/17/2022.

	Total	MMWR Week 50	% Change from Previous Week
Reported Cases	40,735	121	+40.05%
Laboratory Tests	343,187	989	+5.78%
Hospitalizations	1,480	6	+200.00%
Deaths	132	0	0%

Table 3. Describes the number of active cases per 100,000 Gallatin County residents among Vaccine Eligible Age Groups as of 12/18/2022.

Age Group	Number of Active Cases	Total Number of Residents	Active Cases per 100,000
0 to 4	9	5,906	152
5 to 11	10	9,138	109
12 to 17	7	7,616	92
18 to 29	38	28,995	131
30 to 39	19	17,388	109
40 to 49	15	14,113	106
50 to 59	11	11,667	94
60 to 69	23	12,149	189
70 to 79	8	6,846	117
80+	16	2,968	539

Table 4. Describes [CDC community impact level](#) as of 12/19/2022, established to help determine which prevention actions are recommended based on healthcare system strain. Gallatin County is currently experiencing “Low” community impact, as depicted by the black circle on the table below. Data regarding community levels and local indicators are found at the CDC COVID Data Tracker [here](#). During periods of low impact, the CDC recommends staying up to date with COVID-19 vaccines and boosters, maintaining improved ventilation throughout indoor spaces when possible, and following CDC guidelines for isolation and quarantine, including testing if you are exposed or have symptoms. Individuals who are immunocompromised or at high risk for severe disease should have a plan for rapid testing if needed and talk to their healthcare provider about whether they are a candidate for treatments like oral antivirals or monoclonal antibodies.

New COVID-19 Cases Per 100,000 people in the past 7 days	Indicators	Low	Medium	High
		<10.0	10.0-19.9	≥ 20.0
<200	New COVID-19 admissions per 100,000 population (7-day total)	<10.0	10.0-14.9%	$\geq 15.0\%$
	Percent of staffed inpatient beds occupied by COVID-19 patients (7-day average)	<10.0%		
≥ 200	New COVID-19 admissions per 100,000 population (7-day total)	NA	<10.0	≥ 10.0
	Percent of staffed inpatient beds occupied by COVID-19 patients (7-day average)	NA	<10.0%	$\geq 10.0\%$
