QUESTIONNAIRE: Flow of Food for Your Temporary Event Food Service Operation

The flow of food for a temporary event food service operation is the path that food follows from purchasing at the approved source through preparations and sale to the consumer. The steps that make up the flow of food have hazards that must be controlled to protect public health in the prevention of foodborne illnesses.

1. Do you have a current Montana Retail or Wholesale Food License or Cottage Food Registration?

Yes *If yes, please provide your license # or registration # _____ **No**

*State of Montana licensed Food Manufacturer Establishments, Retail Food Establishments with catering endorsements, Mobile Food Establishments are exempt from temporary food event permitting and do not need to complete this form. Registered Cottage Food operators' not vending time/temperature controlled for safety (TCS) foods may potentially be exempt, please talk with a Sanitarian when completing this form.

2. Facility type set-up at event:

Temporary Set-up/ Booth Permanent Building Food Cart Mobile Unit

• If mobile: Will unit be present at the event? Yes No

• If yes, will you have a temporary set-up outside of the mobile unit? Yes No

3. Menu—Provide a list of all food/ beverage products that will be prepared, sold or sampled during the event(s):
(attach extra sheet if necessary)

4. Food Processes used for preparation or service (Check all that apply)

- | | |
|---------------------------------------|--|
| <input type="checkbox"/> Cold Holding | <input type="checkbox"/> Reheating (for hot holding) <i>must reheat to 165°F in 2 hours prior to hot holding</i> |
| <input type="checkbox"/> Hot Holding | <input type="checkbox"/> Reheating (for immediate service) |
| <input type="checkbox"/> Cooking | <input type="checkbox"/> Time as a Control (instead of temperature) |
| <input type="checkbox"/> *Cooling | <input type="checkbox"/> Other (please describe) _____ |

*If cooling, how will foods be cooled to 41°F? _____

5. Will you be preparing food at event or off-site? (*No food preparations may be done in a home kitchen*)

off-site at event location

a.) If off-site, please describe where food will be prepared/ cooked/ refrigerated:

b.) If off-site, how food will be safely transported to event under time/temperature control:

6. Will any food be stored off-site, where? *(No food may be stored in a home)*

7. How will dishes and utensils be washed, rinsed, sanitized, and air-dried prior to and at the event?

8. How will hand washing be done at event, please describe sink type (portable sink/ gravity fed jugs w/ spigot / other)?

9. How will food contact surfaces be sanitized throughout events?

a.) What type of sanitizer will be used? Chlorine at 100 ppm Quaternary ammonia at 200 ppm

b.) What method of sanitizing will be used? Spray bottle & paper towel Bucket and wiping cloths

10. Where will foods be purchased? *(All foods must be obtained from approved sources that comply with law.)*

11. How will food handler's health and personal hygiene be monitored? *(Food handlers may not handle food with communicable diseases that can be transmitted through food.)*

Water Supply & Wastewater Disposal

1. Where will potable water for cooking, hand washing, and food preparation be obtained?

2. How will wastewater and fats, oils, and grease (FOG) be disposed of?

Food Safety Requirements for Temporary Food Establishment Event Vendors

Food Safety to Prevent Foodborne Illness:

- Designate a person-in-charge (PIC) to oversee flow of food operations and food safety at all times.
- Monitor employee health and personal hygiene.
- All food items must be purchased from an approved source.
- All food must be prepared at the event with the proper equipment OR in an approved licensed kitchen prior to event.
- Food prepared prior to event must be transported safely and under time or temperature control.
- Hot foods must be kept at 135° F or above.
- Cold foods must be kept at 41° F or below.
- Use a thermometer regularly during the event to ensure the temperature of hot and cold foods are not in the Danger Zone.
- Ice and coolers (*in non-Styrofoam coolers*) or mechanical refrigeration must be provided to keep cold food at 41° F or below.
- All food vendors must have a thermometer for checking cold and hot holding and cooking temperatures.
- Minimize cross-contamination —clean and sanitize surfaces, equipment, and utensils at least every 4-hours or sooner when needed.

Handwashing Station: A commercial type portable station or a two-gallon or larger container with a free flowing spigot for water, a catch basin, soap, and paper towels should be provided for hand washing.

Bare hand contact: No bare hand contact with ready-to-eat foods is allowed. Tongs, spatulas, scoops, deli tissues or gloves must be used to handle food.

PROPER SET-UP

Sanitization: 100 PPM Chlorine or 200 PPM Quaternary ammonium in bucket with wiping clothes OR sanitizer spray bottle and paper towels must be available. Test strips to test sanitizer concentration must also be available. The

vendor must clean and sanitize food contact surfaces between tasks such as: changing from raw to ready-to-eat foods, before and after using a thermometer, and at least every 4 hours.

Cooking: All raw animal products must be cooked to proper temperatures before serving to customers. The following are the minimum temperature requirements:

- Chicken: 165°F
- Ground beef: 155°F
- Whole pork: 145° F
- Fish/seafood/eggs: 145°F

Thawing: Must be done under cool running water or refrigeration at 41°F or below.

Cooling: Foods must be cooled by approved methods and in accordance with specific time/temperature criteria. Food must cool from 135°F to 70°F within the first 2 hours of cooling. Food must drop from 70°F to 41°F within a total cooling time of 6 hours.

Reheating: Potentially hazardous food items that have been cooked from raw animal products and cooled must be reheated to 165° F within 2 hours prior to hot holding at 135°F or above.

Dishwashing Station: The food service vendor must provide three basins large enough for complete immersion for washing, rinsing, and sanitizing all utensils and equipment that will be used for food preparation and service. Utensils and dishes must then be air dried.

Storage: All food and single-service utensils or dishes must be stored at least 6 inches above the ground or floor and protected from possible environmental contamination.

Employee Health and Hygiene: All Temporary food service employees shall be excluded from work if they are experiencing any of the following: vomiting, diarrhea, sore throat with a fever, open cuts, sores or wound infections.

Additional Requirements:

- Employees may not eat or smoke near food preparation areas. Employee drinks must be covered with a lid and stored away from food service.
- Employees must maintain good personal hygiene and wear clean outer garments and hair restraints when necessary.
- Adequate trash receptacles must be available. Trash should be picked up with enough frequency to minimize pests and other public nuisances.
- All Minimum Requirements for Temporary Food Service must be met in order to operate and be permitted.
- Any Registered Sanitarian may request additional information from you. Please provide information at their request.
- Adequate potable water and proper waste disposal is required. **If well water will be used, a current water test must be provided.** Waste disposal must be through an approved system, such as an RV dump.
- All fats, oils, and grease (FOG) must be disposed of in an approved manner.
