

"Committed to the protection and promotion of public health"

Gallatin City-County Health Department

Reportable Communicable Diseases, 2005-2025,
Gallatin County, Montana
Updated 9/29/2026

Condition	2005	2006	2007	2008	2009	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025
2019 Novel Coronavirus (COVID-19)																9,494	14,382	17,071	3,129	1,894	955
Acute flaccid myelitis														2							
Anthrax																					
Arboviral diseases, neuroinvasive and non-neuroinvasive																					
Arsenic Poisoning																					
Babesiosis																					
Botulism (infant, foodborne, wound, and other)																					
Brucellosis																					
Cadmium poisoning																					
Campylobacteriosis		2	16	23	30	25	36	31	25	34	44	40	44	42	38	31	36	44	42	47	45
<i>Candida auris</i>																					
Carbapenemase-producing carbapenem-resistant organisms																					
Chancroid																					
Chlamydia											2	1	545	545	482	613	587	642	526	452	463
Cholera																					
Coccidioidomycosis				1	2		1	1			2		3	1	2	3	3	4	2	3	1
Colorado tick fever				1			1									3			1	1	
<i>Cronobacter</i> in infants																					
Cryptosporidiosis			4	6	18	9	2	5	10	10	6	13	13	15	18	10	21	12	16	12	70
Cyclosporiasis										2			1	1	1	1	2	2			1
Dengue					1				1		1	1			5				1	1	
Diphtheria																					
Gastroenteritis outbreak			2																		
Giardiasis		1	26	13	21	19	10	11	18	19	15	33	24	9	13	18	11	9	21	22	14
Gonorrhea													29	25	48	44	48	56	57	70	62
Granuloma inguinale																					
Group A Streptococcus, invasive							1													3	2
Haemophilus influenzae, invasive			1	1				2				2		1	1	4		3		3	5

Condition	2005	2006	2007	2008	2009	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025
Salmonellosis (incl. paratyphi/typhi)			16	11	18	11	19	9	15	14	23	12	20								
Salmonellosis (excl. paratyphi/typhi)														19	16	20	15	14	19	26	20
Shiga toxin-producing <i>Escherichia coli</i> (STEC)				10	1	8	5	9	11	5	15	22	11	16	4	10	10	12	16	37	15
Shigellosis			1	3		2	5		5	1	4	3	1	1	2	5		4	6	2	5
Smallpox																					
<i>Streptococcus pneumoniae</i> , invasive								2		2		2	5	5	7		4	5	8	13	9
Streptococcal toxic-shock syndrome												1	3								1
Syphilis, congenital																				1	
Syphilis, early non-primary, non-secondary													4	3	3	4	1	4	3	5	3
Syphilis, late latent												1	2								
Syphilis, primary						1			1	2	3	2	1	2	1		3	9	3	2	
Syphilis, secondary												4	1	3	2	2		2	2	1	
Syphilis, unknown duration or late												1		2	4	3	5	10	13	14	7
Tetanus						1															
Tickborne Relapsing Fever					1																
Toxic shock syndrome, non-streptococcal																					
Transmissible Spongiform Encephalopathies			1			1							1						1	1	
Trichinellosis (Trichinosis)																					
Tuberculosis			1	1	2		1					1							1	1	
Tuberculosis, Latent Infection (LTBI)																3	12	18	38	16	14
Tularemia							1				1		1	1							
Varicella (Chickenpox)		1	9	93	20	14	16	6	8	8	8	4	6	3	5	6	6	3	6		7
Vibriosis (non-cholera <i>Vibrio</i> infections)									1			1	1	4				2	2	2	
Viral hemorrhagic fevers																					

[Montana Reportable Communicable Disease List](#)

2006: Conditions added: Severe acute respiratory syndrome (SARS), West Nile Virus, Arboviral diseases

2013: Removed conditions: Cytomegalovirus Illness, Kawasaki Disease, Reye's Syndrome, Yersiniosis, Viral Meningitis. Updated conditions: Rocky Mountain Spotted Fever is now reported under broader category of Rickettsial diseases/Spotted Fever Rickettsiosis. Creutzfeldt-Jakob Disease is now reported as Transmissible Spongiform Encephalopathies.

2017: Updated required reporting timelines for Shiga toxin-producing *Escherichia coli* (STEC) and Salmonella Typhi. Zika is now reportable under Arboviral diseases. (AMD, 2017 MAR p. 343, Eff. 3/25/17)

2019: Condition added: *Candida auris* (C. auris). Updated definitions and interventions for Multidrug-Resistant Organisms (MDROs). (AMD, 2019 MAR p. 1745, Eff. 1/1/20)

2022: Lowered the capillary blood reporting threshold to ≥ 3.5 µg/dL for children under 16 and mandating universal reporting for any venous blood lead test. (AMD, 2022 MAR p. 1855, Eff. 9/24/22)

2024: Conditions added: Acute flaccid myelitis (AFM); Carbapenemase-producing carbapenem-resistant organisms (CP-CRO); Cronobacter in infants; Group A *Streptococcus*, invasive disease; Multisystem inflammatory syndrome in children (MIS-C). Conditions updated: Anaplasmosis, ehrlichiosis, and spotted fever rickettsiosis, which were previously listed separately, have been deleted and relisted together as: Rickettsial diseases (including spotted fevers, flea-borne typhus, scrub typhus, anaplasmosis, and ehrlichiosis). Monkeypox has been relisted as mpox. Amebiasis is no longer reportable. (AMD, 2024 MAR p. 1885, Eff. 7/27/24)
